

Junior Gap2Gap

All racers will begin at the same start line (1) near the Greenway entrance and run to their color-coded turnaround (**BLUE**, **RED**, or **BLACK**) to get a stamp on their racer tag then return to the Run-To-Bike Exchange (2) to complete the Run Leg.

From there, all team racers (unless completing back-to-back run and bike legs) will exchange wrist bands (racers tags attached) with their bike team member while solo racers will put on their helmets and hop on their bikes. The bike racers will ride to their color-coded turn around (**BLUE**, **RED**, or **BLACK**) to get a stamp on their racer tag then return to the Bike-To-Field Dash Exchange (3) to complete the bike leg.

The Field Dash winds around Sarg Hubbard Park (please see enlarged map). **BLUE** bibs will go to the Field Dash-To-Obstacle Exchange (4) and skip the Kayak while **RED** and **BLACK** bibs will go the Field Dash-To-Kayak-To-Obstacle Exchange (5) and transfer wristbands/racers tags.

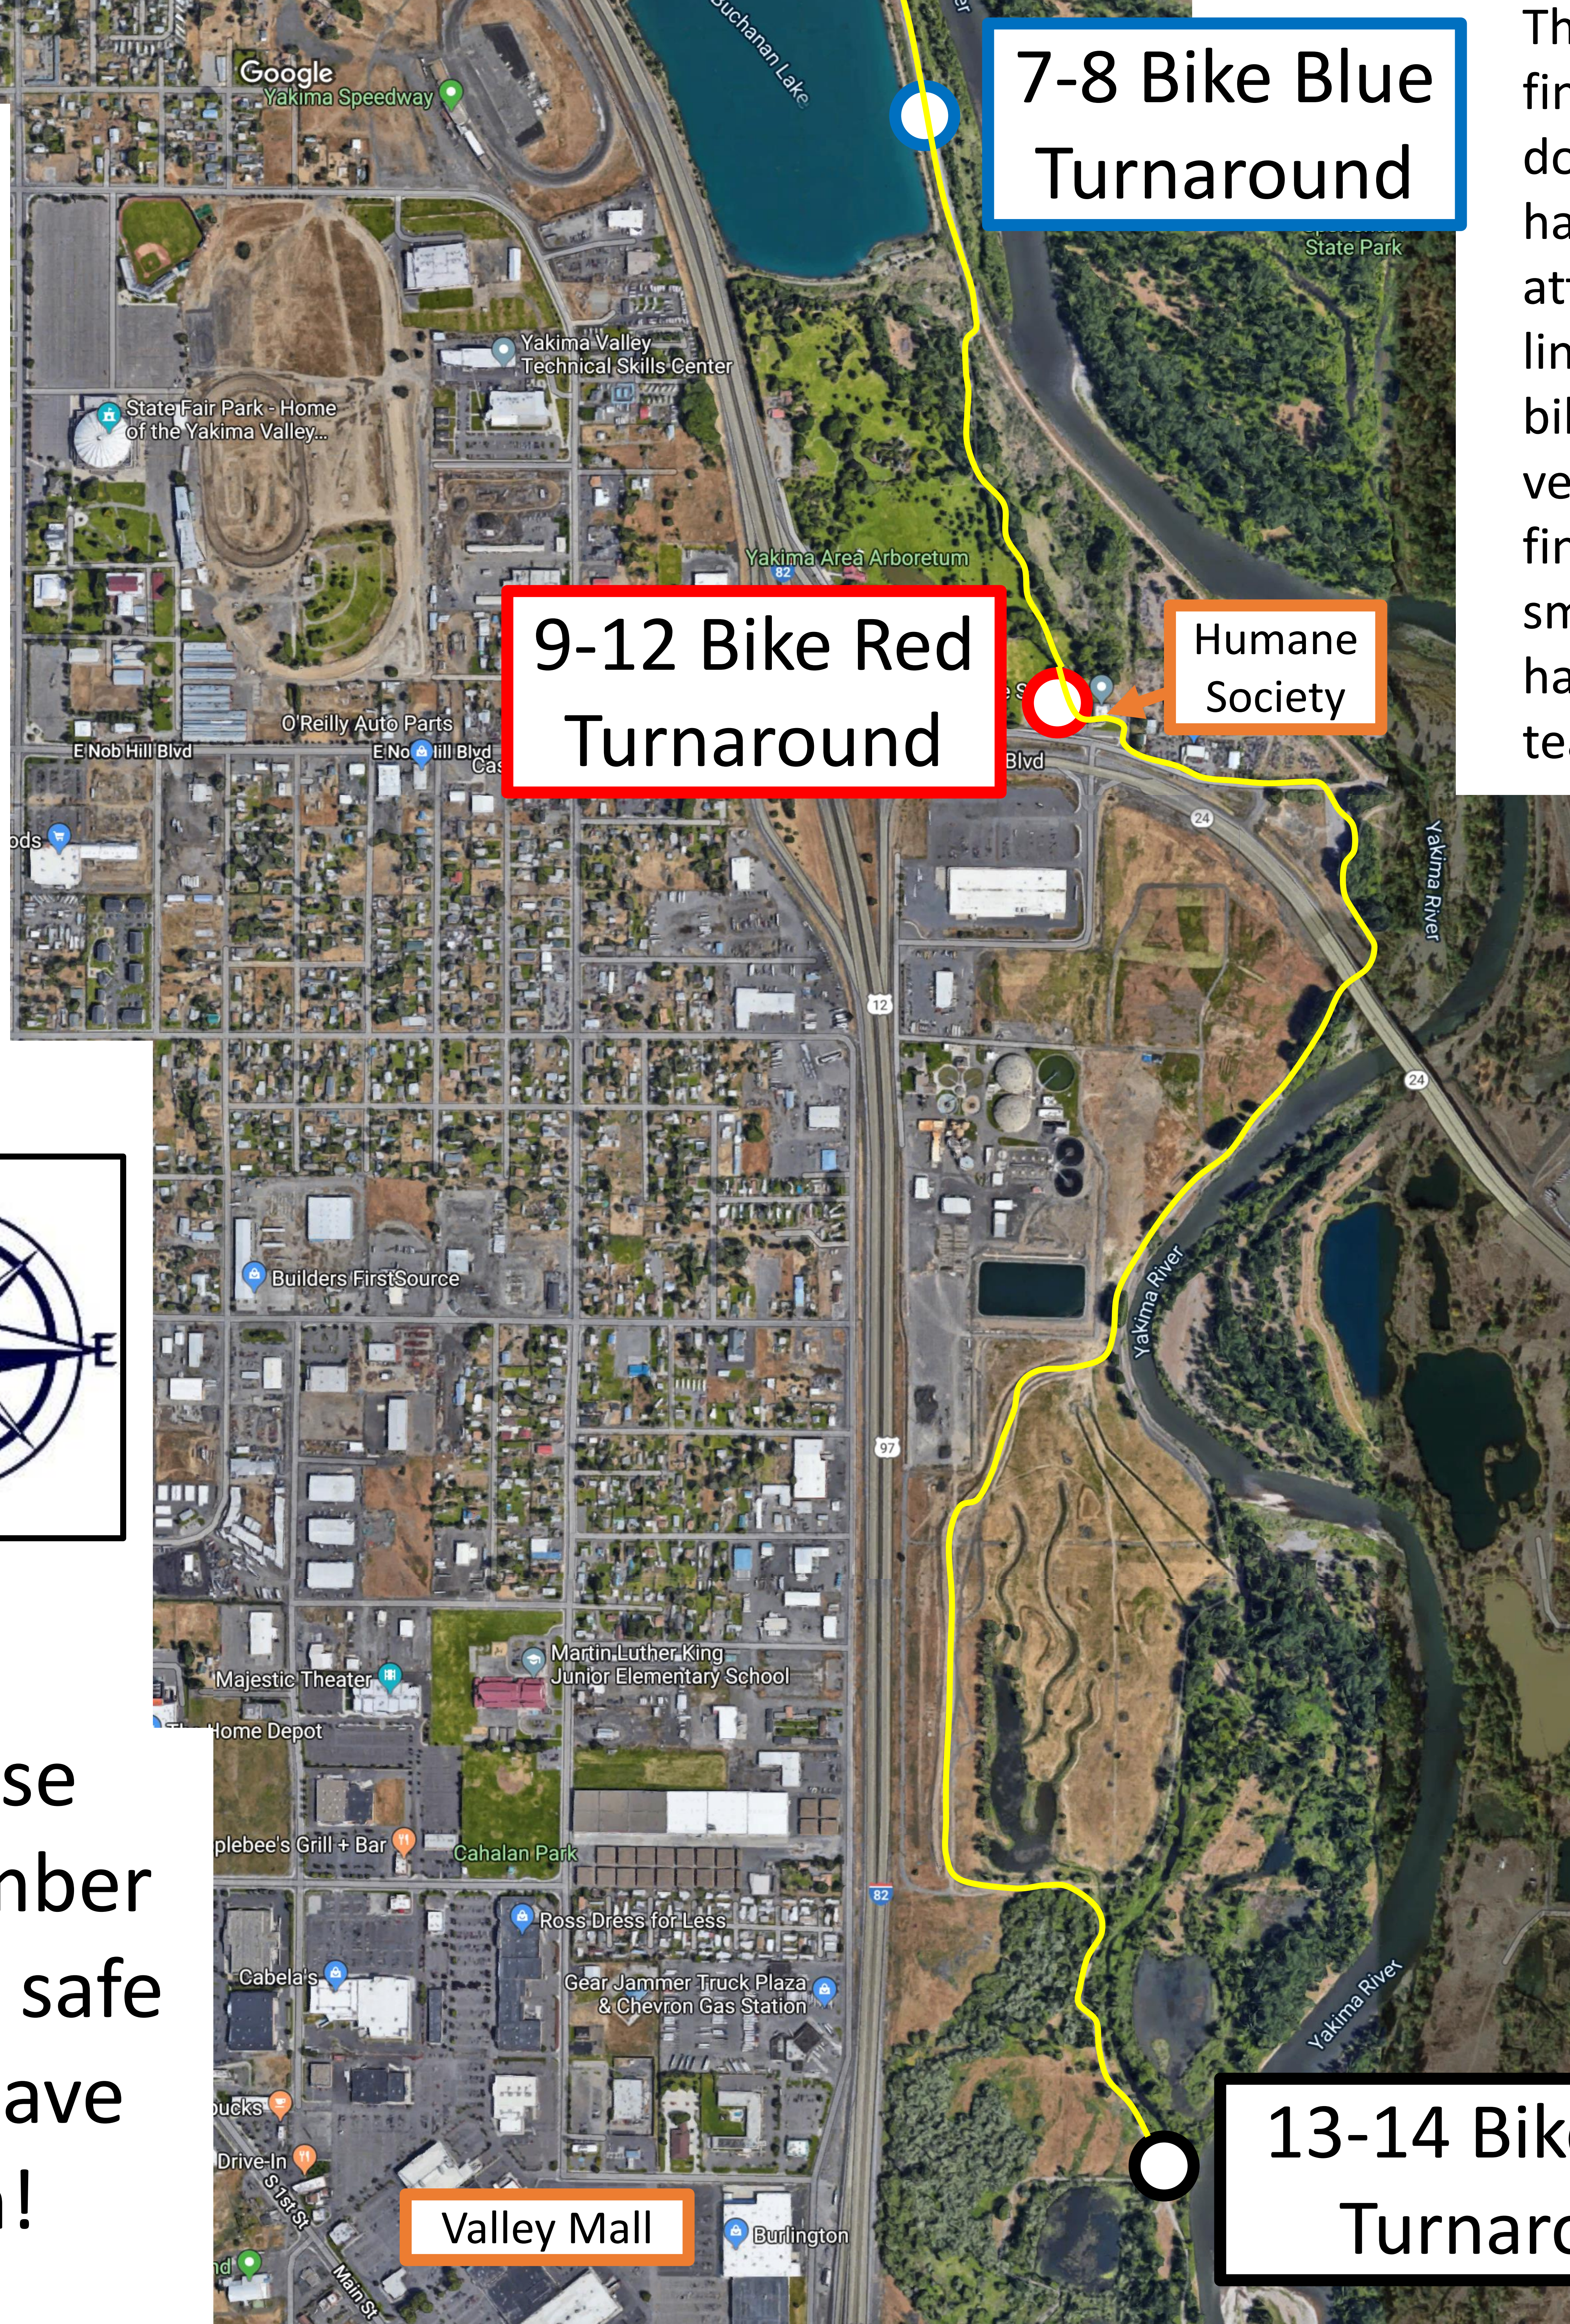

The obstacle course racer will finish the race just after going down the large slip-n-slide and hand off their wrist band with attached racer tag to the finish line officials to record bib/racer tag numbers and verify stamps. To help the finish line standings go smoothly, please refrain from having more than 1 racer per team cross the finish line (6).

Please see the posted wave sheets to determine the start time for your wave, which is directly related to your bib/racer tag number. Despite multiple groups starting at once, you will only be competing against other racers with bib numbers that also have the same first 2 digits.

Example: Racers 1101 and 1102 would be in one competing group while racers 1201 and 1202 would be in different competing group but may be starting in the same wave.

Please remember to stay safe and have fun!
